

CONFINED SPACE SAFETY

What is a Confined Space?

OSHA defines a confined space as an area that has limited openings for entry or exit, is large enough for entering and working, and is not designed for continuous occupancy.

WHAT IS A PERMIT-REQUIRED CONFINED SPACE?

Permit-required confined spaces meet all of the criteria for confined spaces, plus one or more of the following characteristics:

- Contains, or has the potential to contain, a hazardous atmosphere
- Contains material that has the potential to engulf an entrant
- Has walls that converge inward or floors that slope downward and taper to a smaller area that could trap or asphyxiate an entrant
- Contains any other recognized safety or health hazard such as unguarded machinery, exposed live wires, or heat stress

OUR QUALIFICATIONS

- SERVICE TECHNICIAN TRAINING**
All MSC service technicians are trained in confined space safety and awareness
- PERMIT-REQUIRED TRAINING**
Numerous MSC service technicians are fully trained in permit-required confined space entry
- INTERNAL CONFINED SPACE RESCUE TEAM**
MSC boasts an internal confined space rescue team, as required by OSHA for permit-required work, qualifying us for all types of confined space work as a vital turnkey service
